

## Special Issue

# Sustainability in Accounting Management and Corporate Governance

### Message from the Guest Editors

I would like to invite you to contribute to this Special Issue of *Sustainability* with three key areas of focus: sustainability accounting (and accountability), management and sustainability, and governance for sustainability. By combining these three areas together, this Special Issue will serve as a critical reference for a multidisciplinary approach to sustainability thinking and practice. For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Multiple approaches to sustainability (social and environmental) accounting and accountability including but not limited to sustainability reporting, environmental management accounting tools and practices, and social accounting tools and practices;
- Management for sustainability, for example, management planning and action for implementing sustainable development goals;
- Governance, for example, corporate governance policies and actions for sustainability. Government policy and action for sustainability may also be addressed as a broader governance consideration.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
