

## Special Issue

# Sustainable Digital Transformation: Pathways to Resilient Enterprises, Regions, and Nations

### Message from the Guest Editor

The twin transition—digital and green—has transformative potential for industrial value chains, reducing waste and pollution. As organizations adopt digitalization and sustainability, these shifts become vital for environmental protection, business innovation, and circular economy advancement. Yet, the transition is complex, requiring responsible, adaptive, and innovative management. This Special Issue invites research on the challenges and opportunities of digital transformation, including new frameworks, evaluation methods, and decision-making models for sustainable business evolution. While Horizon Europe prioritizes advanced technologies, human and societal dimensions remain underexplored. We welcome studies on technologies, social innovation, circular economy, green transformation, Industry 5.0, and changing societal needs. Submissions may include reviews, empirical studies, or case analyses. All papers will undergo rigorous peer review to support sustainable development.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
