

Special Issue

Environment and Sustainability: Circular Economy, Green Business and Socio-Economy

Message from the Guest Editors

This Special Issue will explore the interdependence among environmental sustainability, economic transformation, and social equity through the lenses of the circular economy, green business, and the socio-economic transition toward sustainable development. Its primary aim is to bridge theoretical insights and empirical evidence that explain how circularity and sustainability-driven innovation can reshape production systems, consumer behavior, and institutional governance in both developed and emerging economies.

The Special Issue will situate itself within a rapidly expanding body of literature on sustainability transitions, extending the debate from ecological efficiency to socio-economic resilience. This issue supplements the existing literature by emphasizing systemic integration—connecting green business strategies, behavioral economics, and social innovation frameworks to measurable outcomes in sustainability performance. By aligning environmental objectives with socio-economic imperatives, this issue will support Sustainability's mission to define, measure, and monitor sustainability through interdisciplinary and policy-relevant approaches.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
