

Special Issue

Environmental Assessment and Management for Sustainable Development

Message from the Guest Editors

Environmental assessment is a methodology that ensures that the environmental effects of decisions are taken into account before the decisions are made. Different environmental assessment approaches are applied in practice, depending if the environmental consequences of a plan, project or product shall be considered.

Environmental management is that part of the management of an organization that deals with the operational and official environmental (protection) concerns of the organization. It serves to ensure sustainable environmental compatibility of company products and processes on the one hand and the behavior of employees and stakeholders on the other.

The Special Issue deals with all dimensions of environmental assessment, its purpose, scope, methodologies, consequences, and key actors. Addressed issues are, but are not limited to: Strategic Environmental Assessment; Environmental Impact Assessment; Life Cycle Assessment; Footprint Assessment; Environmental Management; Co-Management; Environmental Monitoring; Bioindication.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
