

Special Issue

Sustainable Fisheries and Biodiversity Conservation

Message from the Guest Editors

Reductions in natural resources, alongside biodiversity loss, climate change, overfishing, pollution, and habitat shifts, are among the threats to the development of sustainable fisheries. Environmentally friendly fishing technologies, the sustainable use of resources, and the effectiveness of natural resource management can mitigate these threats.

The International Union for Conservation of Nature has established the convention on biological diversity toward the goal of at least 30 percent of terrestrial, inland water, and coastal and marine areas being protected by 2030.

This Special Issue aims to share the scientific achievements related to sustainable fisheries, biodiversity conservation, aquatic management, and relevant socioeconomics in both inland, estuarine, and marine areas. Topics related, but not limited to:

Fisheries sciences and technologies;
Aquatic resource management;
Fisheries policies and development;
Marine Protected Area (MPA) and aquatic species conservation;
Impact of climate change on fisheries and biodiversity conservation;
Effects of noise pollution on aquatic life and fisheries;
Ghost fishing, as well as inland and marine litter;
Stock assessment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
