

## Special Issue

# Modeling and Optimal Management in Wastewater Treatment Processes

### Message from the Guest Editors

We are pleased to invite you to share your novel research results in this Special Issue titled "Modeling and Optimal Management in Wastewater Treatment Processes". As an upgrade to wastewater industries, Industry 4.0 proposed a next-generation intelligent treatment to achieve a better quality, lower cost, and higher flexibility, supporting the sustainability of wastewater management, water resources, and the environment. In Industry 4.0, modeling, diagnosis, control, and optimization are the four most important tools. In this Special Issue, original research articles and reviews related to wastewater treatment topics are welcome. Research areas may include (but are not limited to) the following:

- Measurement, estimation, and prediction;
- Process monitoring, fault diagnosis, and fault prognosis;
- Maintenance and management;
- Digital twin;
- Data-driven dynamic modeling, mechanism modeling, and hybrid modeling;
- Control and optimization;
- Quantum computing and simulations;
- Quality and reliability analysis;
- Industrial applications and studies.

We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
