

## Special Issue

# Feed Resources and Nutrition Strategies for Sustainable Livestock Production

### Message from the Guest Editor

One of the most important agricultural sectors is livestock. It is critical to humans' primary protein food sources, as well as livestock farmers' incomes, ranging from the agricultural industry to smallholder farmers. This Special Issue's goal is to present current research or reviews on the role of feed resources and feeding strategies in sustainable livestock production. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Optimized utilization of conventional and unconventional feed resources.
- New approaches to improving nutritive values of feed resources.
- Sustainable livestock production based on local feed resources.
- Feeding strategies to increase livestock production and sustainability.
- New potential feed resources for sustainable livestock production.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
