

Special Issue

Sustainability of the Agricultural System and Agro-Ecological Environment

Message from the Guest Editor

This Special Issue explores the challenges and opportunities associated with achieving long-term sustainability in agriculture. Key issues such as soil degradation, water scarcity, the loss of biodiversity, and climate change pose significant challenges to the long-term viability of agriculture. This Special Issue welcomes the submission of papers that focus on agroecological approaches and aim to enhance biodiversity, improve soil health, and reduce reliance on synthetic inputs, offering promising solutions for building a more sustainable agricultural system. Collaboration between farmers, researchers, policymakers, and consumers is essential in the creation of a more sustainable food system that can meet the needs of both current and future generations. In this Special Issue, original research articles and reviews are welcome. Research areas may include, but are not limited to, the following:

- Sustainable farming system
- Agricultural ecological environment
- Food security and rural development
- Agricultural land use and climate
- Agricultural soil ecology and biodiversity
- Agricultural policy
- Small farmer economic development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
