Special Issue

Dynamic Strategies for Sustainable Landscape Conservation and Cultural Legacy

Message from the Guest Editors

Landscapes are the result of the action and interaction of natural and/or human factors over time. On the other hand, landscapes persistently evolve, preserving traces of their historical roots, albeit with varying degrees of integrity, while actively contributing to society and the economy. The ongoing international scientific and technical debate revolves around recognizing landscapes as sources of cultural, ecological, and economic richness and acknowledging their significance as a resource to be dynamically preserved, enhanced, and utilized towards a sustainable future. Dynamic strategies for sustainable landscape conservation and cultural legacy merge scientific rigor with community engagement, technological innovation, and interdisciplinary collaboration by integrating insights from ecology, anthropology, history, architecture, agronomy, and economics. This Special Issue will feature a range of scholarly works addressing interdisciplinary aspects crucial for a comprehensive approach. In this Special Issue, original research articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
