

## Special Issue

# Biotechnology on Sustainable Agriculture

### Message from the Guest Editors

This Special Issue welcomes original research articles and reviews, offering a broad spectrum of themes related to sustainable research in agriculture. Research areas may include (but not limited to) the following:

- Organic Farming: studies on organic farming practices and their impacts on agri-food quality and environmental sustainability.
- Sustainable Soil Management: studies on sustainable soil management, including soil health, conservation, and regeneration, to support long-term agricultural productivity.
- Water Management: investigations into efficient water management practices, including irrigation technologies, to conserve water resources and minimize wastage.
- Integrated Pest Management: studies on integrated pest management that reduce the dependency on chemical pesticides and promote natural pest control methods.
- Biotechnology in Agriculture: exploration of biotechnological innovations and applications in agriculture, focusing on crop yield, agri-food quality, and sustainability impacts.

We look forward to receiving your contributions.
