

Special Issue

Sustainable Built Environments

Message from the Guest Editor

The Built Environment is pivotal in addressing future challenges raised by climate change. It is responsible for a significant share of GHG emissions but provides an ecosystem of assets and services essential to modern life. Academics, practitioners, and policy-makers struggle to find the technical, economic, and social solutions and processes to increase the sustainability of the built environment. These solutions and processes often involve a multidisciplinary approach, bringing together industry, research centres, and decision-makers to design, implement, and roll out successful initiatives. This Special Issue intends to provide a set of contributions with practical implications for improving the sustainability of the built environment. Unlike previous collections, this Special Issue will focus on the design, demonstration, and/or implementation of practical contributions for the built environment subsystems: buildings, roads, water supply, energy, waste management, etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
