

Special Issue

Recent Advances in Biomass Conversion, Renewable Energy, and Biomaterials

Message from the Guest Editors

This Special Issue seeks to provide an overview of current developments in the manageable preparation and prospective uses of biomass-derived materials, discovering new strategies for the creation of novel biomaterials employing affordable, low-impact, fast, and scalable industrial processes. In this Special Issue, original research articles and reviews dealing with agricultural and natural resource utilization via chemical and biological conversion approaches are welcome. Research areas include (but are not limited to) the following:

- Agricultural sustainability and management;
- Bioactive products;
- Biomass conversion and refinery process;
- Bio-renewable materials;
- Biomass-derived renewable energy;
- Biomaterials as support platforms for renewable energy production;
- Biomaterials for sustainability;
- Biofuels process;
- Biotechnologies applied for renewable energies;
- Chemical and biological conversions;
- Industrial agricultural and forestry products;
- Industrial application of biorefinery;
- Precision agriculture for sustainability;
- Systems and technologies for improving biomass conversion.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
