

Special Issue

Sustainable Materials and Nanomaterials as a Promising Approach to Meet Future Challenges

Message from the Guest Editors

This Special Issue seeks contributions related to the applications of nanotechnology in fields such as medicine, agriculture, and industry to protect human health and the environment. The topics include the future of nanotechnology considering the challenges, whether at the level of industrialization or in the mechanisms used, to advance this technology and reach a reasonable level of safety. In addition, we aim to explore the future of nanotechnology applications in establishing and using alternative energies to achieve sustainable development. Additionally, we will highlight green nanotechnology to recognize the performance of technology less toxic to humans and ecosystems. Finally, we will suggest future research directions and collaborations to advance the development and implementation of nanomaterials and sustainable materials in nuclear technology. All backgrounds and references are welcome as long as they contribute to developing this sector.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
