

Special Issue

Digital Transformation and Sustainable Supply Chain Management (2nd Edition)

Message from the Guest Editors

Operations and supply chains have been experiencing significant changes resulting from technological transformations. Digitalization tightly connects the supply chain, completely changing how data are collected, distributed, and processed in the supply chain network. However, the challenge of integrating digitalization with sustainability issues across the entire supply chain is still enormous, requiring further investigation. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: -Strategic roles of digital transformation in operations and sustainable supply chain management; -Challenges and opportunities of digitalization in the field of sustainability; -Different digital technologies and their effects on sustainable supply chain performance; -The digital platform, business model transformation, and sustainable supply chain; -Digital transformation and the formation and evolution of sustainable ecosystems; -The joint effect of digital technologies and the social factors in the field of sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
