

Special Issue

Fostering the One Health Approach in Environmental Education: Innovations, Challenges, and Opportunities

Message from the Guest Editors

Understanding Environmental Education (EE) is increasingly complex due to its multidisciplinary nature. Traditional EE in teaching has mainly focused on conveying ecological content and raising awareness of environmental issues without a clear emphasis on actionable objectives. This Special Issue aims to contemplate the novel educational direction required to achieve high-quality and transformative "Education for Environmental, Animal, and Human Health (One Health)". This entails educating students about healthy environmental characteristics, signs of deterioration, the impacts of an unhealthy environment on human and animal health, and everyday actions to prevent and mitigate damage. Ideally, this would foster an understanding that environmental issues vary across regions and affect organisms differently. We particularly encourage the submission of studies that investigate how incorporating the One Health approach into classrooms through EE can motivate citizens to enhance sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
