

## Special Issue

# Concerning the Application of Big Data-Based Techniques to Social Sciences

### Message from the Guest Editor

Multidisciplinary contributions from scholars with a background in information systems, communications, politics, business, technology, e-research, digital humanities, knowledge management, and data-oriented fields are encouraged to submit a paper to this Special Issue. Potential research topics that may be addressed include (but are not limited to):

- Practical applications of Big Data in communication, online information systems, new media and technology, digital humanities, knowledge management, and broader social sciences;
- Data collection and processing techniques for unstructured data;
- Machine learning for Big Data analytics;
- Analyzing social media in the social sciences;
- Testing theories or models using Big Data;
- Techniques to handle Big Data for e-research (e-politics, e-education, e-government, e-science, etc.);
- Measuring and monitoring data-driven research on the Internet;
- Developing a Big Data formula for online activities;
- Data-centric storytelling and scenarios;
- Case studies relating to the application of data science in interdisciplinary areas.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
