Special Issue

Sustainable Environmental Management of Waste Plastic: Purification, Multi-Path Utilization, Contaminant Control, and Governance Policy

Message from the Guest Editors

The global accumulation of plastic waste has reached critical levels, and conventional waste management systems struggle to address the complexities of mixed plastic streams and the environmental persistence of microplastics. Emerging challenges include the adsorption of toxic pollutants on aged plastic surfaces, the release of hazardous byproducts during thermal recycling, and the lack of sector-specific regulations to drive circular economy transitions. While advancements in material recovery technologies show promise, significant gaps remain in scaling up purification processes, ensuring economic viability for diverse utilization pathways, and aligning policy frameworks with technological innovation.

This Special Issue seeks to bridge these gaps by fostering interdisciplinary dialog among researchers. We invite contributions that address the full lifecycle management of plastic waste, from advanced sorting systems to cross-sector valorization strategies, while integrating pollution mitigation and governance mechanisms. Particular emphasis will be placed on systemic approaches that harmonize technical feasibility, environmental sustainability, and regulatory enforceability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
