Sustainable Geotechnical Treatment Technology

Message from the Guest Editors

Geotechnical treatment technologies, including ground strengthening, slope protection, and seepage control in soils and rocks, are of special importance for the safety and serviceability of infrastructure systems. However, traditional geotechnical treatment technologies may have adverse impacts such as the generation of waste materials, high energy consumption, high carbon emission, and the deterioration of local environments and ecological systems, among others. In recent years, a range of sustainable solutions have been investigated to mitigate the abovementioned problems. Some typical examples involve the use of wastes as fill materials or soil binders, bacteria- or plant-based soil modification, the application of smart techniques for construction and field monitoring, etc. Substantial advancements have recently been achieved in this area, in both academia and the industrial sector.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
