Special Issue

Sustainable Development in Industrial and Academic Projects: Bridging Theory and Practice

Message from the Guest Editors

The Special Issue, "Sustainable Development in Industrial and Academic Projects: Bridging Theory and Practice." addresses the need for sustainable development across industrial and academic fields. It explores how sustainable practices are incorporated into project management, identifying synergies between industry initiatives and academic research. Emphasizing practical applications, this issue aims to bridge theory and real-world implementation for sustainable systems and policies. This collection contributes to existing literature by offering insights into sustainability tools, best practices, and policies that support sustainability in large-scale projects. It also provides new frameworks and case studies for assessing and monitoring socioeconomic sustainability in industrial and academic contexts. Bringing together interdisciplinary research, this Special Issue supports the journal's mission to advance sustainability through integrated approaches. Topics include sustainability indicators, collaborative platforms, project lifecycle sustainability, and policy implications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
