

Special Issue

Application of Sustainable Practices in Food Engineering

Message from the Guest Editors

The Special Issue aims to explore and promote environmentally friendly, economically viable, and socially responsible approaches within the food engineering sector. Its scope encompasses sustainable technologies, resource efficiency, and environmental impact reduction throughout the food production process. This includes waste minimization, water conservation, and sustainable packaging solutions. Furthermore, it considers the impact of sustainable practices on food safety, food quality, nutritional value, and the circular economy. The purpose of this issue is to encourage the widespread adoption of sustainable innovations within the food industry by highlighting best practices, successful case studies, and technological advancements. This issue also aims to raise awareness among stakeholders about the importance of sustainability in food production and foster educational efforts for the next generation of food engineers. This initiative supports the development of a more sustainable food system that meets global demands while preserving natural resources and enhancing economic and social well-being.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
