

## Special Issue

# Education for Environmental Citizenship—2nd Edition

### Message from the Guest Editors

Education for Environmental Citizenship (EEC) is a type of education that cultivates a coherent and adequate body of knowledge as well as the necessary skills, values, attitudes, and competencies that an environmental citizen should be equipped with in order to be able to act and participate in society as an agent of change in the private and public sphere, on a local, national and global scale, through individual and collective actions. It pushes them toward solving contemporary environmental problems and preventing the creation of new environmental problems to achieve sustainability and develop a healthy relationship with nature.

The scope of this Special Issue is to provide a platform for researchers to share their research work on the field of education for environmental citizenship including aspects of civic engagement and civic participation, democratic action, social and environmental change, individual and collective actions, environmental actions, socio-political actions, environmental justice, inter- and intra-generational justice and connectedness to nature.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
