Special Issue

Aquatic Biodiversity under the Impact of Climate Change

Message from the Guest Editor

Globally, climate change has become the fastest and biggest growing threat to aquatic biodiversity. Therefore, we would need to discuss how climate change affects aquatic biodiversity and ecosystems, and how it could be mitigated through proper actions. This Special Issue aims to contribute to our understanding of the responses of aquatic organisms, aquatic ecosystems and life-history traits to climate change across aquatic environments from tropical to polar regions. Research articles, review articles, and case studies are welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
