Traffic Accident Analyses and Road Safety for Sustainable Transportation

Message from the Guest Editors

Road traffic crashes are considered a serious and life-threatening problem worldwide, causing an estimated 1.3 million fatalities and between 20 and 50 million injuries per year, according to WHO data in 2019. Road accidents are not limited to motor vehicle drivers, but affect all road users, such as vulnerable road users (i.e., pedestrians, cyclists and motorcyclists and their passengers). In addition, new forms of mobility, such as Personal Mobility Vehicles or Automated and Connected Vehicles, generate conflicts and accidents that represent a new challenge to be investigated.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
