

## Special Issue

# New Innovative and Attractive Models for Promoting Circular Economy Actions Between Industrial Parks and Surroundings Areas: The Scientific Focus

### Message from the Guest Editors

The SI is a scientific target of the Italian Research Project (PRIN PNRR), entitled “CE\_IPsa: A development model for Circular Economy between Industrial Parks and surroundings areas”—CUP: J53D23016630001; CI: P20227NFA4.

This Special Issue (SI) explores how Industrial Symbiosis (IS) and Circular Economy (CE) can drive sustainable development by fostering connections between Industrial Parks (IPs) with surrounding areas. The aim is to develop a locally grounded circular development model, fostering new resource acquisition supply chain restructuring, and circular entrepreneurship. Submissions should explore drivers for IS/CE implementation, best practices, and guidelines for circular industrial policy. The SI welcomes papers on IS/CE methodologies, IP and surroundings, development model definition, development plan creation, and the construction of a Decision Support System to guide stakeholders.

### Guest Editors

Prof. Dr. Roberta Arbolino

Department of Human and Social Sciences, University of Naples “L’Orientale”, L.go San Giovanni Maggiore 30, 80134 Naples, Italy

Prof. Dr. Giuseppe Ioppolo

Department of Economics, University of Messina, Piazza Pugliatti 1, Messina, Italy

### Deadline for manuscript submissions

30 September 2025

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
