

Special Issue

Impact of COVID-19 on Public Health Behaviors

Message from the Guest Editors

In view of our understanding of COVID-19 evolving and the sustainable development goals (SDGs) of psychology growing, this Special Issue focuses on discussing the impacts of COVID -19 on neuropsychological functioning or psychological well-being in the general population or individuals with certain medical conditions, such as neurological or psychiatric disorders. How they face or experience the COVID-19 pandemic was considered, which was viewed as a kind of trauma. Therefore, the post-traumatic growth resulting from the COVID-19 pandemic is also covered in this Special Issue. The scope of discussion covers children, adolescents, young adults, middle-aged and older adults of the general public or patients with certain illnesses. This Special Issue may supplement the literature on people's neuropsychological outcomes and psychological well-being (quality of life, post-traumatic growth, etc.) following the COVID-19 pandemic. Research conducted with cross-sectional or longitudinal designs and quantified and evidence-based original studies are welcome. Additionally, well-organized systematic reviews are also sought.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
