

## Special Issue

# Downscaling Sustainable Development Goals (SDGs) for Water Resources Management in Countries, Basins, and Sub-basins

### Message from the Guest Editors

Achieving the United Nations Sustainable Development Goals (SDGs) will require recontextualizing the goals in every country, basin, or sub-basin to cope with the diversity of local conditions and priorities across regions. In particular, several SDGs provide general guidelines for water resource planning and management at the local scale. This Special Issue aims to publish research on the synthesis of country/region experiences, local SDG water indicators, evidence-based decision support tools for local water management practices, and SDG-based guidelines for practices at the basin and sub-basin scales. Overall, papers to be published in this Special Issue will contribute to the sustainability literature via systematic methods for assessing spatiotemporal progress towards achieving water-related SDGs, as well as collaborative efforts that enhance co-learning between scientists and stakeholders.

### Guest Editors

Prof. Dr. Ximing Cai

Department of Civil and Environmental Engineering, University of Illinois, Champaign, IL, USA

Dr. Erhu Du

School of Environmental Science and Engineering, Southern University of Science and Technology, Shenzhen 518055, China

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
