

## Special Issue

# Innovative Approaches to Sustainable Management in Hospitality and Tourism

### Message from the Guest Editor

The hospitality and tourism industry faces increasing pressure to operate sustainably, as it significantly impacts environmental resources, local communities, and global economies. While the existing literature has examined areas such as eco-certifications, green operations, and responsible tourism models, much of this research remains fragmented or focused on isolated case studies. There is a growing need for integrated, interdisciplinary research that not only documents sustainable practices but also evaluates their effectiveness, scalability, and contribution to broader sustainability goals. This Special Issue aims to explore innovative approaches to sustainable management in the hospitality and tourism sectors. We invite empirical studies, theoretical contributions, and case analyses that examine topics such as eco-innovation in hotel operations, circular economy strategies, sustainable tourism planning, stakeholder engagement, and digital tools that enhance sustainability performance.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
