Special Issue

The Governance of the Low-Carbon Transition for Sustainable Development

Message from the Guest Editor

The focus of this Special Issue is to explore various governance frameworks and strategies to facilitate a smooth and effective transition to a low-carbon economy, ultimately promoting sustainable development. The scope will cover various topics, including policy formulation, implementation, and evaluation; stakeholder participation and collaboration; technological innovation and diffusion; and the social and economic impacts of the low-carbon transition. This Special Issue aims to provide a comprehensive understanding of the governance challenges and opportunities related to the low-carbon transition and to provide practical insights and recommendations for policymakers, practitioners, and researchers. It will complement the existing literature by providing the latest research and case studies. We suggest that relevant works should be combined with previous research to enhance their relevance and impact. At the same time, we recommend that relevant works should be able to compare research findings across different contexts to provide practical insights and recommendations, attract different perspectives, and highlight future development directions and research areas.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
