

## Special Issue

# Advanced Studies of Pollutants in Water, Air, and Soil: Assessment and Remediation

### Message from the Guest Editor

We aim to publish cutting-edge research that addresses soil degradation, groundwater resource management, pollution prevention, and remediation strategies. This Special Issue encourages interdisciplinary studies that integrate geochemistry, hydrology, microbiology, and environmental policy to develop innovative solutions for soil and groundwater conservation. We prioritize work that contributes to the sustainable use of these resources, ensuring the protection of both natural ecosystems and human health. By fostering a deeper understanding of the complex interactions between soil and water, our Special Issue seeks to inform and guide policy, management practices, and technological advancements that promote environmental resilience and the long-term viability of our planet's critical resources. We are particularly interested in studies that explore the nexus of soil and water in the context of climate change, urbanization, and agricultural intensification, as these factors significantly influence the health and integrity of our soil and groundwater systems.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
