

Special Issue

Quality Management as a Springboard to Solve Sustainability Issues

Message from the Guest Editors

As the human footprint permeates ecosystems, economies, and whole societies as an effect of the Anthropocene, the already close connection among environmental, social, and economic dimensions of sustainability has become more significant than ever. Therefore, we hope the topics including but not limited to the following:

- The role of institutional context in incentivizing or discouraging sustainable innovation;
- Approaches to frame the interplay among quality, sustainability, and innovation;
- Barriers and facilitators dealing with business models centered on quality-driven sustainable innovation;
- The role of quality management in fostering individual and collective sustainability;
- Sustainable innovation and resilience of social-ecological systems;
- Sustainable innovation and corporate governance;
- Sustainable innovation and quality management along society, economy, and environment;
- Sustainable innovation in the metaverse.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
