

Special Issue

Sustainable Electric Power System and Renewable Energy

Message from the Guest Editor

With the eventual and inevitable depletion of conventional fossil fuels, renewable energy sources are expected to play a key role in modern society, also in consideration of the increasing energy demand and attempts to achieve the Sustainable Development Goals (SDGs) as an urgent call. Therefore, minimizing greenhouse gas emissions as much as possible is a must for achieving an energy transition in the near future. In this scenario, wind, solar, hydrogen, ocean, and other sources can be incorporated into the world's energy matrix while considering the specific characteristics of each region. This Special Issue aims to create a forum for experts, professionals, and readers interested in topics related to sustainable energies and modern power systems. We invite researchers and professionals to present their work in progress related to such subjects (including emerging technologies).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
