

Special Issue

Advancing Sustainability through the Development of Innovative Nanomaterials

Message from the Guest Editors

This Special Issue of Sustainability, 'Advancing Sustainability Through the Development of Innovative Nanomaterials,' aims to collate research mainly related to the impact and influence of new nanomaterials synthesis based on the use of precursors or catalysis that are harmless to the environment, comes from natural resources, or are obtained from the post-treatment of waste type sources. Other relevant areas include the incorporation of nanomaterials into technological applications to improve performance or reduce the negative impact on environment; the use of tools based on data analysis and artificial intelligence to reduce the number of experimentations and create new synthesis routes for the development of nanomaterials to be used in energy, remediation, and water treatment applications; the use of innovative nanomaterials for CO₂ capture and CO₂ reduction technologies.

Guest Editors

Dr. Juan Luis Fajardo Diaz

Sustainable and Green Carbon Institute, Faculty of Engineering, Shinshu University, Matsumoto 380-0928, Japan

Dr. Gabriela Durán-Jiménez

Chemical and Environmental Engineering, University of Nottingham, Faculty of Engineering, University Park, Nottingham NG7-2RD, UK

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
