Special Issue

Sustainability Challenges and Progress in the Wine & Beverage Industry

Message from the Guest Editors

The wine and beverage industry is under mounting pressure from both external and internal stakeholders to further decrease its environmental footprint and improve its social and economic performance. Various companies have met the challenge and strive to integrate sustainability targets (e.g., to achieve carbon neutrality or foster biodiversity) into their strategy. In order to reach these goals, the industry has to overcome several hurdles along the value chain, such as the extensive use of fungicides in the vineyards or the environmental impact associated with the usage of single-use glass bottles. The focus of this Special Issues is 1) on the identification of the key sustainability challenges from an industry perspective and 2) on the development and assessment of approaches, which help to increase sustainability in the wine and beverage sector. Such approaches could include the deployment of sustainable management techniques, certification schemes, new technologies or novel business models.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
