

## Special Issue

# Sustainable Environmental Protection: Climate Change and Ecological Remote Sensing

### Message from the Guest Editor

In this Special Issue on “Sustainable Environmental Protection: Climate Change and Ecological Remote Sensing,” we are soliciting research papers that demonstrate the development of new models and methods (physical/mathematical/computational), data analysis, data products, and/or research observations in the area of climate change and ecological remote sensing studies. The range of topics includes but is not limited to:

- novel remote sensing technologies;
- climate change;
- climate projections;
- meteorological reanalysis;
- carbon emission;
- air pollution;
- natural resources;
- water resources;
- agricultural practices;
- sea-level change;
- ice and snow cover;
- land cover changes;
- droughts effects;
- disaster management (storm, flood, forest fire, etc.).

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
