

Special Issue

Building Information Modeling (BIM) and Sustainable Construction Management Operations

Message from the Guest Editor

We are pleased to confirm that the submission portal is now open for the Special Issue on “Building Information Modeling (BIM) and Sustainable Construction Management Operations”. While the construction industry traditionally lags behind other sectors in terms of technology adoption, it has embraced advanced technologies in both construction and management operations. One such innovation is building information modeling (BIM), which allows architects, engineers, and construction experts to visualize the entire construction project, fostering improved collaboration and coordination among diverse teams. These technological advancements are continuously evolving and are poised to revolutionize the construction industry further, enhancing the efficiency, cost-effectiveness, and environmental sustainability of construction processes. Full papers are invited in areas including but not limited to:

- Building Information Modeling (BIM);
- Sustainable Construction Management;
- Built Environment;
- Advanced Materials;
- Artificial Intelligence (AI);
- Smart Buildings;
- Augmented Reality (AR) for Construction;
- Energy-Efficient Technologies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
