

Special Issue

Soil and Water Conservation for Desertification Control under Climate Change

Message from the Guest Editors

This Special Issue will provide the premier forum for presenting new advances and research results in the fields of soil and water conservation for desertification control under climate change. The topics of interest for submission may focus on the new technologies regarding soil and water conservation together with the important results related to the novel approaches. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: effects of climate change on land degradation, erosional and depositional processes, land degradation and restoration, water-saving agriculture, urban water harvest, resilient cities, watershed management, resource management, environmental sustainability, hazardous substances, and detection techniques. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
