

Special Issue

Economic Performance, Circular Economy and Sustainable Entrepreneurship

Message from the Guest Editor

To better understand circular economy and a company's environmental strategies, we expect to gain more insights into the likely outcomes of sustainable entrepreneurship's environmental strategies, and our Special Issue focuses on advancing the understanding of how sustainable entrepreneurship simultaneously makes sense in terms of both environmental performance and economic performance. The purpose of this Special Issue of MDPI's journal *Sustainability* is to gather research papers on advances in environmental performance, economic performance, social performance, marketing strategy, demarketing strategy, green strategy, green organization capability and organization environmental learning, etc. Relevant issues other than the above-mentioned topics are also welcome to be included in this Special Issue. For this Special Issue, we are calling for submissions related to but not limited to the above topics. Papers that may contribute to a better understanding of circular economy and sustainable entrepreneurship are invited.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
