

Special Issue

Towards a Sustainable Future: Innovative Approaches in Project Management

Message from the Guest Editors

Innovations in project management, driven by technological advances and inter-organizational collaboration, are transforming how projects are planned, executed, and evaluated while also advancing sustainability. This Special Issue, “Towards a Sustainable Future: Innovative Approaches in Project Management”, aims to provide a comprehensive overview of how innovative project management practices can drive sustainability from the very beginning of a project’s conception through to its completion and beyond. It seeks to offer insights into new methodologies and tools that practitioners, academics, and policymakers can use to make projects not only more efficient and cost-effective but also more sustainable and socially responsible. We invite researchers, practitioners, and policymakers to contribute original research articles, reviews, case studies, and theoretical articles that address various aspects of innovation in project management towards achieving sustainability. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
