

Special Issue

Soil Microbiota and Ecology in Sustainable Agroecosystems

Message from the Guest Editor

For this Special Issue, we invite authors to submit articles focused on the assessment of microbial communities in agroecosystems from an ecological perspective. We welcome papers that examine ecological changes resulting from various agricultural practices—such as crop type, tillage, fertilization, and pesticide application—as well as interactions between different species or communities. Our focus primarily on the soil microbiota, but studies about plant–microbe interactions are also welcome. Of particular interest are investigations into the ecological impacts of the increasingly widespread use of soil inoculant products. In addition to papers reporting on experiments, we similarly welcome review articles.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
