

Special Issue

Food, Supply Chains, and Sustainable Development—Second Edition

Message from the Guest Editor

This Special Issue of Sustainability entitled “Food, Supply Chains, and Sustainable Development—Second Edition” aims to explore different strategies and technologies enabling stakeholders to both earn profits and achieve sustainability, as well as seeking to engage with the complicated relationships between farms and other elements of food supply chains. This Special Issue welcomes submissions covering, but not limited to, the following topics: Food enterprise strategies for achieving sustainability and reducing losses; Trade-offs between corporate social responsibility, environmental impacts, and profits; Technologies that improve food supply chain operational efficiency and achieve sustainability; Innovative theories and approaches regarding the coordination of all members vertically and horizontally; Public policies that encourage enterprises to make greater efforts; Approaches to enhancing consumer awareness of sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
