

Special Issue

Sustainable Agriculture: Soil, Water and Environmental Practices in Climate Change

Message from the Guest Editors

This Special Issue, titled “Sustainable Agriculture: Soil, Water and Environmental Practices in Climate Change”, explores sustainable agricultural practices with a focus on soil health, water management, and environmental conservation in the context of climate change. It examines strategies for optimizing water use, enhancing soil fertility, and implementing eco-friendly farming techniques to improve agricultural resilience, as well as food quality and security. Key topics include carbon sequestration, adaptive irrigation, drainage optimization, biodiversity preservation, and climate-smart farming methods such as crop rotation, conservation tillage, and organic practices. By integrating scientific research with practical applications, this Special Issue serves as a valuable resource for researchers, policymakers, agronomists, and environmental professionals committed to advancing sustainable agriculture and mitigating climate change impacts.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
