Special Issue

The Sustainable Development of Villages and Small Towns under the Situation of Population Contraction

Message from the Guest Editors

Villages and small towns are vital elements of settlement systems around the world. Since the second half of the 20th century, many villages and small towns worldwide have confronted an increasingly severe phenomenon of population contraction. Hence, how to lead the sustainable development of depopulating villages and small towns becomes an urgent problem to break through. We are pleased to invite the submission of papers to this Special Issue "Sustainable Development of Villages and Small Towns under the Situation of Population Contraction". In doing so, we aim at deepening our understanding of the development trend of worldwide villages and small towns, enriching the research perspectives, methodologies and object types of issues associated with the sustainable development of villages and small towns, urban shrinkage, urbanization, etc., and providing references for possible intervention strategies and measures. Please check the details of the special issue via the link

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
