

## Special Issue

# Trends in Circular Economy, Innovation and Management

### Message from the Guest Editors

Circular economy provides many opportunities to advance overall sustainable development, including the consideration of planetary boundaries and measures to tackle climate change. It is also closely connected to environmental, economic and social sustainability in addition to being highly relevant as a cross-cutting theme encompassing multiple societal sectors and aspects of social life. Many interesting developments are taking place globally to promote circular economy in different contexts. This Special Issue welcomes research articles focusing on circular economy in various contexts encompassing a broad spectrum of topics. In general, perspectives on how to promote a system-level change towards sustainability including ways to keep products, components, and materials at their highest utility and value at all times, covering both technical and biological cycles, are much appreciated. Suggested topics related to circular economy and sustainability:

- Circular economy;
- Innovation;
- Management and assessment;
- Circular design;
- Implementation of concepts and principles (e.g., the 10 Rs);
- Education, training, know-how, skills and competencies;

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
