

Special Issue

Marine Science and Sustainable Energy Power Engineering

Message from the Guest Editors

This Special Issue aims to attract a wider readership in the field of marine science and sustainable energy power engineering by providing an overview of recent advances in renewable energy and the growing recognition of the importance of marine ecosystems. The interrelated fields of marine science and sustainable energy power engineering address the challenges of harnessing renewable energy from the ocean while maintaining environmental sustainability, analysing the impacts of climate change, pollution and human activities on the marine environment, with the aim of conserving and restoring marine ecosystems. In the context of marine science, studies exploring ways to harness the vast energy resources available in the ocean, such as tidal, wave and offshore wind energy, are strongly encouraged in this Special Issue to help reduce dependence on fossil fuels, mitigate climate change and promote a sustainable energy future. In the search for sustainable energy solutions, solutions that contribute to the development and implementation of renewable energy technologies with minimal environmental impact are of particular interest.

Guest Editors

Prof. Dr. Paulo Jorge Rosa-Santos

Prof. Dr. Francisco Taveira Pinto

Dr. Ana Margarida Bento

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
