

## Special Issue

# Critical Thinking and Practices in Climate Change and Environmental Policy

### Message from the Guest Editor

Sustainability—the demand for long-term and globally practicable lifestyles and economies—is increasingly being understood as the central challenge of our time. Undoubtedly, natural scientific and technical knowledge of problem relationships in dealing with nature, resources and climate is important. However, technical change does not happen on its own. In addition, the ecological challenges are simply too great not to aim for a behavioural change, including structural change as well as technology. These are the starting points of this Special Issue: critical thinking and practices in climate change and environmental policy. The goal is to investigate, for example, the conditions for individual and social change, the policy instruments for zero fossil fuel use across all sectors and drastically reduced livestock emissions, as well as normative issues. Transdisciplinary approaches—that is, approaches that do not operate from disciplinary boundaries but from questions of content without excessive subordination to established disciplinary dogmas—may play a special role.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
