

## Special Issue

# Digital Solutions for Promoting a Circular Economy and Sustainability

### Message from the Guest Editors

In this Special Issue, entitled “Digital Solutions for Promoting a Circular Economy and Sustainability”, original research articles and reviews are welcome. Research areas may include, but are not limited to, digital solutions and emerging technologies (e.g., IoT or blockchain) for:

- Business process re-engineering toward greater social and environmental sustainability;
- Business process re-engineering toward a circular economy and traceability;
- Intra- and inter-organizational business process integration;
- Traceability in value and supply chains;
- Promoting sustainability and a circular economy in any business sector (textile and clothing industry, car industry, building, energy, agriculture, food supply chains, marketing, etc.);
- Engaging business partners, at any level of the value chain, to increase environmental sustainability and participate in a circular economy;
- Engaging end customers to increase environmental sustainability and participate in a circular economy by using new types of consumer-targeted apps (e.g., using gamification techniques).

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
