Sustainable Operations & Supply Chain Management

Message from the Guest Editors

Sustainable operations and supply chain management have become paramount in today's business landscape. Companies increasingly recognize the importance of integrating environmental, social, and economic factors into their practices. Sustainable operations aim to minimize resource waste, reduce energy consumption, and adopt eco-friendly processes, reducing their carbon footprint. In parallel, supply chain management is evolving to ensure responsible sourcing, ethical labor practices, and efficient logistics to minimize its environmental impact. With the aging of the population, we are also interested in sustainable operations that ensure products and services are designed with longevity, accessibility, and environmental responsibility in mind, contributing to a more inclusive and eco-conscious silver economy. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
