# **Special Issue**

# Autonomous Systems and Intelligent Transportation Systems

### Message from the Guest Editors

The transportation system is a large-scale complex and structured system that impacts almost all of the components of a local society. The transportation system is also recognized as one of the largest contributors to emissions. Intelligent transportation systems (ITS) have emerged as the integration of advanced transportation technologies to crucially contribute to a greener, safer, and more efficient future transportation system. On the other hand, autonomous systems will transform ITS with several technological enablers such as vehicle IoT, big data, autonomous driving, machine learning, and advanced networked control methods to accomplish safer, coordinated, and sustainable traffic management. This Special Issue covers different topics that address the most recent advances in autonomous systems for ITS.:

- Autonomous driving for sustainable ITS
- Multiagent machine learning for large-scale traffic flow control
- Traffic management through the vehicular to everything communication (V2X)
- Decision-making for vehicular networks in dynamic environment
- Federated learning-based ITS
- Cloud and Fog computing for decision-making in ITS
- Real-time network optimization in ITS

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
