

Special Issue

Innovative and Sustainable Pavement Materials and Technologies

Message from the Guest Editors

During recent years, pavement engineering has been an important area of research due to the vital role of road infrastructures in the social and economic growth of communities. A lot of research has been conducted looking for more durable, economic and environmentally friendly roads by using innovative pavement materials and designs. Additionally, sustainability issues are now top of the agendas in many countries, and most governments, agencies and practitioners are now paying attention to sustainable technologies and solutions, especially in construction works. In this context, the sustainable design and construction of road infrastructures and the development of sustainable pavement materials and technologies have gained attention, not only to reduce the environmental impact of road construction, but also looking for the multifunctional use of the road infrastructure. This Special Issue addresses the above-mentioned issues and aims to gather recent research works that provide advances in Innovative and Sustainable Pavement Materials and Technologies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
