

## Special Issue

# Biodiversity, Biologic Conservation and Ecological Sustainability

### Message from the Guest Editors

Since the beginning of the Industrial Revolution (Anthropocene), ecosystems have been widely affected by anthropogenic activities. These impacts lead to serious environmental problems such as the loss of biodiversity or the alteration of ecosystems.

Understanding these ecological problems is a key concern for conservation purposes, essential to developing research on these threats that allows the development of adequate management plans. Implementing effective management actions to promote ecological integrity is based primarily on a deep understanding of how biotas and ecosystems react to multiple stress factors. Under this conservation paradigm, it is necessary to attend to a sustainable model in which the three aspects of sustainable development fit together to allow the conservation of our planet, promote social equity, and develop human societies. Papers comprising this Special Issue of Sustainability must be original contributions focused on biodiversity and the conservation biology of species and ecosystems. This includes all aspects related to ecosystem restoration and all issues related to ecosystem sustainability.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
